Australian Wild Life

The Australian Museum Series of Post Cards, beautifully delineated and printed in four colours, depict typical forms of our interesting and wonderful fauna.

The Mammal Series, comprising one set of six subjects, illustrates our unique marsupials and monotremes in a setting typical of their natural environment.

The Bird Series, consisting of six sets of five subjects each, shows charming examples of our bird fauna, which, it is acknowledged, contains some of the most beautiful species in the world.

The Ethnological Series contains twelve half tone reproductions in art brown from photographs taken by Captain Frank Hurley during his Papuan expeditions, and illustrates many phases of the daily life and occupations of these people who still live in the Stone Age.

Suitable for Christmas and New Year Greetings.

ONE SHILLING per set, posted 1/1.

Special quotations to the Trade and Educational Institutions.
